SRS/SDD Self-Review Report – Review 2

PROVISIONAL REVIEW ONLY. Current HEAD c32f2a4c0a54. The local review-2 tag is absent; rerun officially after the team freezes and tags the complete inputs. Findings below are retained verbatim from SelfReview_Provisional_Raw.md.

1. Run Information

Project code	TBD (PKV working abbreviation)
Project name	PickleVerse – Multiplayer Pickleball Skill-Training and Match Game with AI Coaching
Team	Names and IDs deferred
Supervisor	Lại Đức Hùng (proposal)
AI tool and model	Codex; GPT-6 family; exact UI identifier pending
Run date	23 October 2026
Repository tag / commit	No local review-2 tag; c32f2a4c0a546d0ed4f0df1b2c97e185ed831fb6
Registration form version used	Supplied proposal; approved version unconfirmed
Version	Draft 0.2 — not approved
Date	23 October 2026

2. Standard Prompt

The following standard prompt is copied without modification. This draft does not certify the missing official tagged run.

```
You are reviewing the SRS and SDD of a software capstone project against its
registration form and source code. Report only; do not change any file.

Inputs: the registration form, SRS, SDD (with diagrams), source code and
database script in this repository.

Check:
1. Scope: FRs in the SRS not covered by the registration form, and
   registration items with no FR.
2. Requirements: FRs without an actor or testable acceptance criteria;
   NFRs without metric, threshold and measurement method.
3. Data: entities missing from the Logical ERD; ERD entities or attributes
   missing from the database script, and tables not in the ERD.
4. States: for each main entity, states used in code but missing from its
   state machine; transitions with no triggering FR; states with no exit.
5. Flows: main business flows in activity diagrams with no implementation
   or no test.
6. Architecture: components or third-party services in code but not in the
   architecture diagram, and the reverse.
7. Design vs code: modules, APIs or business rules implemented differently
   from the SDD.

Output one table: ID | Category | Location | Finding | Severity
(High/Medium/Low) | Evidence. Then list the 5 most important findings.
If something cannot be verified from the repository, say so; do not guess.
```

3. Findings and Team Response

Team response: Fixed (link to commit) · Kept (reason) · Planned (owner and due date). Do not delete any finding.

ID	Category	Location	Finding	Severity	Evidence	Team response
SR01	Architecture	Registration vs SDD actual design	Photon Fusion Shared gives a peer state authority. This is not the proposed trusted dedicated simulation and leaves host/peer trust risk.	High	My project/Assets/Scripts/Multiplayer/PhotonSession.cs:116	Unconfirmed draft action — assign named owner and due date after team review.
SR02	Scope	F05 F14 and N06	The active progression runtime requires server state. Offline drill execution and exactly-once later synchronization are not demonstrated.	High	My project/Assets/Scripts/Progression/ProgressionRuntime.cs:8	Unconfirmed draft action — assign named owner and due date after team review.
SR03	Scope	F05 and N06	Initial-placement ML, telemetry technique classifier, labelled evaluation and validated recommendations are not evidenced. Rule-based feedback does not establish those commitments.	High	My project/Assets/Scripts/LocalMatch/BotMatch.cs:11	Unconfirmed draft action — assign named owner and due date after team review.
SR04	Design vs code	F15 administrator sign in	The React login sends emailOrUsername/passwordHash and reads role/token, while the API requires Email/Password and returns AccessToken/Profile. The default contracts are incompatible.	High	src/Frontend/src/context/AuthContext.tsx:41	Unconfirmed draft action — assign named owner and due date after team review.
SR05	Data	F15 user status mutation	Admin mutations serialize enum status as Banned/Active while the SQL constraint uses ACTIVE/BANNED/SUSPENDED; these values can fail the database constraint.	High	src/Backend/Services/Implementations/AdminService.cs:82	Unconfirmed draft action — assign named owner and due date after team review.
SR06	Flows	F16 content publication	Admin lesson creation omits catalog Code/Config, while the game catalog selects coded configured lessons. CRUD does not yet demonstrate publishing a playable drill.	High	src/Backend/Services/Implementations/AdminService.cs:159	Unconfirmed draft action — assign named owner and due date after team review.

ID	Category	Location	Finding	Severity	Evidence	Team response
SR07	Scope	F17 F18 administration	Complete live-match oversight, appeals and operational analytics are not evidenced. ActiveUsersToday currently counts all users rather than dated activity.	High	src/Backend/Services/Implementations/AdminService.cs:353	Unconfirmed draft action — assign named owner and due date after team review.
SR08	Requirements	N01 through N06 and Report 5	Current-revision physical-device, network/load, security, availability, offline and ML acceptance results are unavailable. Test source is not execution evidence.	High	src/Database.sql	Unconfirmed draft action — assign named owner and due date after team review.
SR09	Flows	Review 2 baseline and CI	The local review-2 tag and CI execution evidence are absent; the required official tagged self-review and automated-in-CI target cannot be verified.	High	src/Database.sql	Unconfirmed draft action — assign named owner and due date after team review.
SR10	Scope	BM03 and registration baseline	The approved registration revision, official project code and decisions accepting stack/authority deviations are unconfirmed. No scope reduction has been assumed.	Medium	src/Database.sql	Unconfirmed draft action — assign named owner and due date after team review.
SR11	Architecture	Online result validation	Server-owned transactions and matching human reports improve result integrity, but peers still supply simulation outcomes and training measurements. Agreement does not independently prove legal physics.	Medium	src/Backend/Services/Game/OnlineGameService.OnlineMatches.cs:182	Unconfirmed draft action — assign named owner and due date after team review.
SR12	Scope	Optional account invitation UX	Real friendship APIs and room-code play exist and cover the proposal room-code requirement. Account-targeted invitations are an unverified desired UX extension; confirm whether they should become a separate commitment.	Medium	src/Backend/Services/Game/OnlineSocialService.cs:27	Unconfirmed draft action — assign named owner and due date after team review.

ID	Category	Location	Finding	Severity	Evidence	Team response
SR13	Architecture	Deployment secrets and platforms	Fallback authentication configuration, deployed TLS/AES-256 controls, production rollback and iOS build acceptance require deployment evidence; configuration values are intentionally redacted.	Medium	My project/Assets/Scripts/Services/Api/UnityApiTransport.cs:17	Unconfirmed draft action — assign named owner and due date after team review.

4. Top 5 Findings (as reported by the AI)

#	Finding ID	Summary
1	SR01	Photon Fusion Shared gives a peer state authority. This is not the proposed trusted dedicated simulation and leaves host/peer trust risk.
2	SR02	The active progression runtime requires server state. Offline drill execution and exactly-once later synchronization are not demonstrated.
3	SR03	Initial-placement ML, telemetry technique classifier, labelled evaluation and validated recommendations are not evidenced. Rule-based feedback does not establish those commitments.
4	SR04	The React login sends emailOrUsername/passwordHash and reads role/token, while the API requires Email/Password and returns AccessToken/Profile. The default contracts are incompatible.
5	SR05	Admin mutations serialize enum status as Banned/Active while the SQL constraint uses ACTIVE/BANNED/SUSPENDED; these values can fail the database constraint.

5. Summary

Severity	Total	Fixed	Kept	Planned
High	9	0	0	0 confirmed; 9 awaiting response
Medium	4	0	0	0 confirmed; 4 awaiting response
Low	0	0	0	0 confirmed; 0 awaiting response

All nine unresolved High findings appear in BM01 section 5. Team responses, named owners and dates are unconfirmed; no fix or review approval is claimed.
